

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Cancelled) [An information on demand system comprising:

a server apparatus for providing information according to a request from a subscriber;

display means for displaying said information provided by said server apparatus; and

recording means for recording said information provided by said server apparatus;

wherein a different amount is charged to said subscriber among a) in the case in which said information is provided to said display means, b) in the case in which said information is provided to said recording means and c) in the case in which said information is provided to said display means and to said recording means.]

2. (Cancelled) [An information on demand system comprising:

information providing means for providing information according to a request from a subscriber;

information receiving means for receiving said information provided by said information providing means;

display means for displaying a further information signal output from said information receiving means;

recording means for recording said further information signal of said information receiving means;

subscriber mode discriminating means for discriminating whether said further information signal of said information receiving means is provided to one of said display means and said recording means;

charging means for charging a different amount among a) in the case in which said further information is provided to said display means, b) in the case in which said further information is provided to said recording means and c) in the case in which said further information is provided to said display means and to said recording means according to an output of said subscriber mode discriminating means; and,

charge registering means for registering charge data output from said charging means.]

3. (Original) A server apparatus comprising:

subscriber identification means for reading an identifying information to identify a subscriber;

information providing means for providing information according to a request from said subscriber;

subscriber mode recognizing means for discriminating whether said information providing means provides said information a) to a subscriber display means, b) to a subscriber recording means or c) to said subscriber display means and said subscriber recording means;

charging means for charging a different amount among a) in the case in which said information is provided to said subscriber display means, b) in the case in which said information is provided to said subscriber recording means and c) in the case in which said information is provided to said subscriber display means and to said subscriber recording means according to an output of said subscriber mode recognizing means; and

charge registering means provided for every subscriber for registering a charge data output from said charging means; and wherein said charge registering means accumulates the charge data output from said charging means at said charge registering means corresponding to said identifying information according to a discriminating information discriminated at said subscriber identification means.

4. (Original) A server apparatus comprising:

provided information designating means for providing information requested by a subscriber to a server;

information receiving means for receiving said information provided by said server according to said subscriber request;

subscriber mode discriminating means for discriminating whether an information signal output from said information receiving means is provided a) to a display means, b) to a recording means or c) to both the display means and the recording means and informing said subscriber through said information receiving means.

5. (Cancelled) [A subscriber apparatus comprising:

information receiving means for receiving a provided information according to a request from a subscriber;

subscriber mode discriminating means for discriminating whether a further information signal output from said information receiving means is provided a) to a display means, b) to a recording means or c) to both said display means and said recording means;

charging means for charging a different amount among a) in the case in which said further information is provided to said display means, b) in the case in which said further information is provided to said recording means and c) in the case in which said further information is provided to said display means and to said recording means according to an output of said subscriber mode discriminating means; and

charge registering means for accumulating an amount output from said charging means.]

6. (Cancelled) [A subscriber apparatus as recited in claim 5;

wherein the charge registering means periodically informs the subscriber's charge to a server.]

7. (Original) A subscriber apparatus comprising:

demodulating means for demodulating an information signal provided by a server; and

terminal control means for inputting a demodulated information signal of said demodulating means, outputting a signal to recording means which records said demodulated

information signal in a recording medium in which a subscriber identification number is recorded and controlling supply of the output signal; and wherein

said terminal control means registers said subscriber identification number recorded in said recording medium of said recording means and an information identification number provided from said server in said terminal control means, when a subscriber finishes the recording of the information signal provided from said server in said recording medium of said recording means.

8. (Original) A subscriber apparatus as recited in claim 7; wherein

said demodulated information signal is not output to said recording means, when the subscriber identification number is not recorded in the recording medium of said recording means.

9. (Original) A subscriber apparatus as recited in claim 7 or 8; wherein

an identification number of said recording means is used instead of the subscriber identification number.

10. (Original) A subscriber apparatus as recited in claim 9 wherein:

said subscriber is determined from the identification number of said recording means; and

a charge is collected from said subscriber.

11. (Original) A subscriber apparatus as recited in claim 10 wherein when the subscriber records information provided from an information providing apparatus, said information can not be recorded unless the subscriber is approved by the server.

12. (Twice Amended) A method for providing a program having a title on demand comprising the steps of:

receiving a first request requesting said program having said title;

receiving a second request requesting said program having said title;

transmitting the information to a subscriber display means for displaying said program having said title without causing recording of said program having said title responsive to said first request, and

transmitting said program having said title to a subscriber recording means for recording said program having said title responsive to said second request,

charging different amounts depending upon whether the transmitted program having said title is a) displayed without being recorded responsive to the first request or b) recorded responsive to the second request,

wherein said request for said program having said title indicates whether the subscriber is recording said program having said title on said recording means.

13. (Twice Amended) An apparatus for providing a program having a title on demand comprising:

receiving means for receiving a first request for said program having said title,

and a second request for said program having said title,

. sending means for sending said program having said title to a subscriber display means without causing recording of said program having said title responsive to said first request and sending said program having said title to a subscriber recording means for recording said program having said title, and

charging means for charging different amounts depending upon whether said program having said title is a) intended for recording on said recording means, or b) displayed on said display means without being recorded,

wherein said request for said program having said title indicates whether said program having said title is being recorded on said recording means.

14.-20. (Cancelled)

21. (New) A method according to claim 12, wherein said program is other than a shortened version of said program which is displayed for a lower charged amount than said program being displayed without being shortened.

21. (New) An apparatus according to claim 13, wherein said program is other than a shortened version of said program which is displayed for a lower charged amount than said program being displayed without being shortened.
